ments

ON THE WESTERN FRONT.

A new model of the Overlander is being built in a 40' from British sources. This machine follows the same principle as the Overlander but is built for the purpose of carrying a large number of men and their equipment.

These trucks being taken up for the Overlander in the trench.

Official photo. These are the Overlander trucks.

This report was prepared for use by the U.S. Army and is not to be distributed outside the Army.
